

# 3D Top Cover System

## What is Acor's 3D Top Cover System?

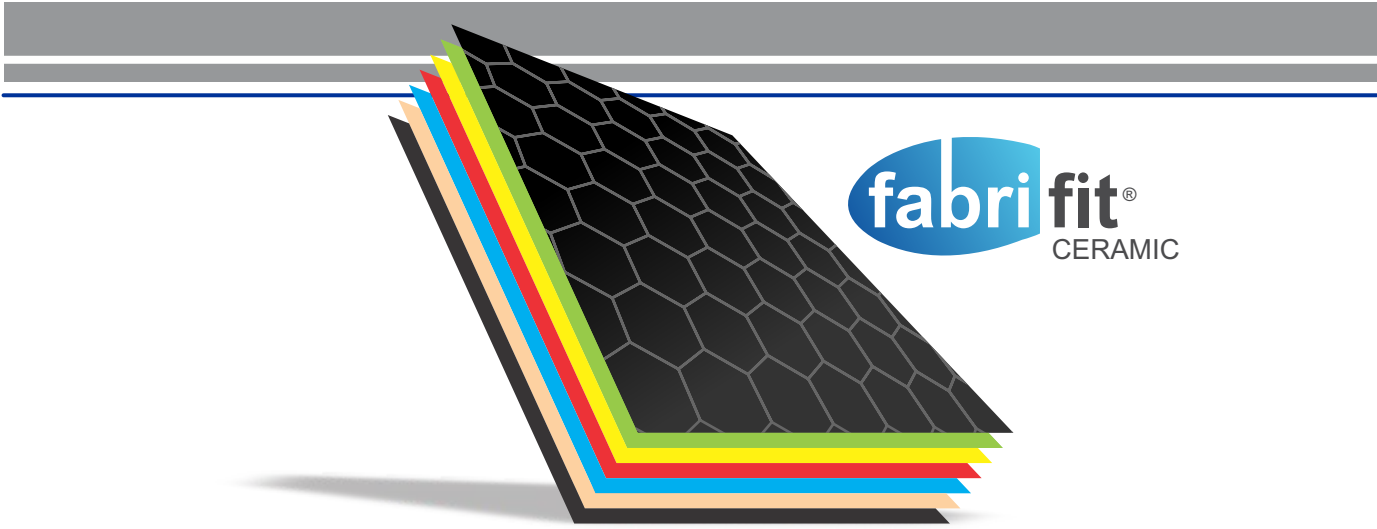

**3D** means three dimensions of performance, giving any foot orthotic system a distinct set of characteristics that provide the wearer with a competitive advantage.

- **Dimension 1 - Moisture Control**
- **Dimension 2 - Shock Absorption**
- **Dimension 3 - Desired Responsiveness**

Combining these three layers into one high performance lamination makes this top cover ideal for 3D printed, milled or ready-to-wear foot orthotics.

Fabritfit Ceramic is available in three colors, standard Fabritfit is available in over 50 colors and EchoCel comes in six colors. There are hundreds of design and function combinations possible to make the **Acor 3D Top Cover System** unique to your project.
